

【DOCUMENT NAME】 ABSTRACT

【ABSTRACT】

【PROBLEM】

5 The present invention to provide a polyester fabric which is light in weight, high in density and flexible and, at the same time, has a sufficient level of tear strength, by using extra-fine polyester multifilaments finer as compared with the conventional polyester multifilaments.

【MEANS TO SOLVE】

10 A polyester fabric having a total cover factor of not lower than 1500 and a mass per unit area of not higher than 45 g/m<sup>2</sup>,

wherein said polyester fabric is composed of polyester multifilament A yarns having a total fineness of not  
15 higher than 25 dtex (decitex) and a single yarn fineness of not higher than 2.0 dtex and multifilament B yarns having a total fineness of not lower than 35 dtex,

wherein the arrangements of the respective yarns in the warp and weft directions are such that the yarn constitution ratio "B yarn/A yarn" is 1/4 to 1/20 (number of  
20 yarns-to-number of yarns ratio) and wherein the A yarn-to-B yarn pitches are not longer than 7 mm.

【REPRESENTATIVE DRAWING】 None
